

A COMMENT ON THE INSTITUTE

First of all I want to say that was a grate instiut and I learn alot of things that I didn't no.

1. program what it means

by program is when you go out in a comminty and work with the people and then you have a program

2. and the meaning orgnize and I often ask myself what do the people mean by use the word orgnize and I kept searching until I found the answer to that question. And the answer that I found is that you don't go out in a comminty and tell the people what they want. You go and work with the people and see what they want and then by working with these people and see what they want then you go back and ask yourself now where do I go from here and then you began to think now I no what these people want now I got to draw up a program and see that these people get what they want and that is some of the meaning of organizing and whatever they want . that is your foundation and their program and ever program they want it can be freedom school (nurse school) intgrat/ sit in/ community sinter/ boycott/ walk out
